Education

Bennett University <i>B.Tech in Computer Science and Engineering(CGPA: 9.20 / 10.00)</i>	Expected May 2026 Greater Noida
St. Xavier's School <i>Higher Secondary Education (Percentage: 88.6)</i>	March 2021 Bhiwadi, Rajasthan
St. Xavier's School <i>Secondary Education (Percentage: 92.4)</i>	March 2019 Bhiwadi, Rajasthan

Experience

Software Engineer Intern — Salescode.ai

- Engineered an automated data processing module using Java + Next.js to generate CSV reports and distribute them to business analysts.
- Enhanced the **Shield** analytics platform by developing UI components and optimizing Jenkins-triggered workflow automation.
- Developing an internal **API Testing Framework** to standardize endpoint validation and improve CI/CD reliability across product teams.

Projects

StocksGod | [Repository Link](#) | [Deployment Link](#)

- Engineered a full-stack stock forecasting platform using Stacked LSTM with 2% test error on real-market data.
- Elevated prediction performance by 30% through data pipeline refinement and live Tiingo API ingestion.
- Deployed an in-platform Botpress financial assistant to streamline user guidance and engagement.
- Tech-Stack: TensorFlow, Keras, LSTM, Python, Flask, Tiingo API, Botpress, MongoDB**

Skin Disease Classification | [Repository Link](#)

- Designed a ResNet50-based model for 5-class disease detection achieving 66% accuracy and 0.88 ROC-AUC.
- Delivered real-time diagnosis with confidence scoring for user-uploaded dermatology images.
- Benchmarked performance using ROC curves and confusion matrices for higher reliability and medical interpretability.
- Tech-Stack: Python, TensorFlow, Scikit-learn, ResNet50, Pandas, Matplotlib, Seaborn**

Suraksha AI | [Repository Link](#)

- Applied YOLOv8 for real-time threat recognition on continuous video streams with high inference speed.
- Curated and labeled threat datasets, cutting false alerts by 30% and strengthening detection precision.
- Integrated the model into a Flask backend for autonomous video analytics and alerting workflows.
- Tech-Stack: Python, Flask, Firebase, OpenCV, YOLOv8, Poetry**

Technical Skills

Languages: Python, C++, HTML, CSS, Javascript

AI/ML Tools & Frameworks: TensorFlow, PyTorch, NLP, Computer Vision, Pandas, NumPy, YOLO

Tools & Frameworks: Power BI, Git (Version Control), Atlassian Jira, GitHub, Canva, Visual Studio Code

Databases: MySQL, MongoDB

Coursework: Data Structures and Algorithms, Data Science (Specialization), Operating Systems, DBMS, Computer Networks

Achievements

- Cleared the **ServiceNow Certified System Administrator (CSA)** exam and became a certified ServiceNow Administrator.
- Recognized as one of the top 110 students in the Google Cloud Study Jam at Bennett University, earning the **Google Cloud Certified: Cloud Computing Foundations** Certificate.
- Completed Pw skill **Data Science Masters 2.0** course of 9 months.
- Solved 350+ Data Structures and Algorithms problems on **LeetCode**.
- Won the 3rd prize in Spin The Code contest organised by **GeeksForGeeks** in December 2022.

Position of Responsibilities

- Tech Head:** Data Science Society, Bennett University.
- Organiser** Organised an Inter-College Hackathon ENIGMA in which more than 50 teams have participated from Delhi-NCR region In April 2024.
